PROFILE SUMMARY

Software developer with one year experience eager to advance my career skills in the software engineering field. My long-term career goal is to use my skills to create products that are sustainable, accessible, inclusive and available.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology

BSc. Information Technology

Sept 2022 – June 2026

- **Relevant Coursework:** Software Project Management, Programming, Database Management, Business Intelligence, Artificial Intelligence

Moringa School

Full stack software development

July 2022-Jan 2023

- Built several applications ranging from single-page web applications to complex full-stack applications with HTML, CSS, JavaScript, React, Redux and Ruby on Rails.
- Developed skills in remote pair-programming using GitHub and daily standups to communicate and collaborate with fellow developers remotely.

eMobilis Mobile Institute of Technology

Web Development

Jan 2022- March 2022

- Learnt and built original code and showcase expertise through comprehensive portfolio projects utilizing CRUD functionalities using HTML, CSS, JavaScript and PHP.

EXPERIENCE

Meru County Revenue Board

ICT Support Attaché

May 2024- August 2024

- Installed and configured 20+ computer systems, ensuring a 100% setup accuracy rate.
- Resolved 50+ hardware and software issues for end users, achieving an average resolution time of under 30 minutes per issue.
- Monitored network performance daily, identifying and resolving 10+ outages proactively, maintaining 99.9% uptime for services.

PROJECTS

Splendid Events

A platform where users can purchase tickets for events

<https://splendid-client-kappa.vercel.app/>

- Collaborated and utilized Restful APIs and CRUD to build a ticketing web application that provides users' access to view events and filter them on the place, time and type of event one is interested in.
- Integrated PayPal as a payment method reducing a 1-hour process of verification to 5 minutes.
- Built with React.js, Tailwind, PostgreSQL, Ruby on Rails.

RuNFTs

Web application that allows users to buy and sell arts

<https://runfts.netlify.app/>

- Designed and implemented an application that allows users to create and upload NFTs to support artists of their choice using React.js and CSS.
- Utilized Styled components to build responsive, mobile-first user interfaces, contributing to a 20% increase in user engagement and a 30% improvement in page load times on mobile devices.

Edufam

A parent teacher communication platform

<https://edufam.vercel.app/>

- Developed and deployed using clerk authentication, enhancing login security for users.
- Implemented an application that allows teachers to upload students results, attendance and fees allowing parents gain access to the child information.
- Optimized backend and frontend performance, resulting in a 25% improvement in application load time and increased member engagement.
- Utilized bulk SMS and USSD through integration with Africa's talking APIs
- Built with TypeScript and Node.js

SKILLS

Back End | Ruby, Ruby on Rails, Node.js PostgreSQL, MySQL

Front End | React, JavaScript, TypeScript, Tailwind

Developer Tools | Git, GitHub

Soft Skills | Communication, Problem-solving, Teamwork, Critical thinking
